

ABSTRAK

Pandemi COVID-19 menyebabkan laju pendapatan nelayan mengalami penurunan dikarenakan distribusi yang sulit dan aktifitas di TPI semakin sepi. Selain itu, mengakibatkan aktifitas perijinan dan pelayanan berlayar bagi nelayan dibatasi dengan tidak dilakukan pelayanan langsung. Tujuan dari penelitian ini untuk mengetahui produksi perikanan tangkap dan pendapatan nelayan kapal 5 dan 6-10 GT di TPI PPS Cilacap pada saat terjadinya Pandemi Covid-19. Metode yang digunakan yaitu metode observasi dan wawancara. Hasil dari penelitian ini yaitu Produksi perikanan di PPS Cilacap saat pandemi Covid-19 pada bulan Maret - Juni 2020 didapatkan 1.690,24 ton artinya mengalami peningkatan 19,08% pada tahun 2019. Pendapatan nelayan mengalami penurunan dari sebelum Pandemi Covid-19 karena daya serap produksi perikanan oleh pasar yang menurun.

ABSTRACT

COVID-19 pandemic has caused the income rate of fishermen to decline due to difficult distribution and activities at TPI are increasingly quiet. In addition, it results in limited licensing activities and sailing services for fishermen with no direct service. The purpose of this study was to determine the capture fisheries production and income of fishermen on boats 5 and 6-10 GT at TPI PPS Cilacap at the time of the Covid-19 Pandemic. The method used is the method of observation and interviews. The results of this study were fishery production at PPS Cilacap during the Covid-19 pandemic in March - June 2020, which obtained 1,690.24 tonnes, meaning that it had increased 19.08% in 2019. Fishermen's income decreased from before the Covid-19 Pandemic due to absorption capacity. fishery production by decreasing market.
